Press Release

Chandigarh, March 17:- An innovative science exhibition 'Science Express' is going to halt at Chandigarh Railway Station from March 18 to 20, 2010. The main aim of the state-of-the-art mobile science exhibition is to develop scientific temper among the masses and encourage students to pursue career in science.

The 16 coach AC train is equipped with cutting edge research in different fields of science. It hosts interactive exhibits developed by Max Planck Society, Germany, Department of Science & Technology, Government of India and Vikram A Sarabhai Community Science Centre (VASCSC), Ahmedabad in 11 coaches. In addition to it, the exhibition also hosts an demonstration on Climate Change in one coach while in another coach, Joy-of-Science hands-on lab of VASCSC has been put up for conducting over 60 interesting experiments & activities in science and mathematics along with an exhibition on India's heritage in Science & Technology.

This innovative exhibition, which created four national records, received unprecedented response at all the halts in the first two phases. In its third phase, it has so far travelled to 150 cities across India. The exhibition is primarily for the students of standard IX and above. There will be no entry fee for the Science Express exhibition.
